Hello!

Our office would like to take a moment and address the current topic of the COVID-19 or Novel Coronavirus pandemic. Currently, the virus that causes COVID-19 is infecting people and spreading easily from person-to-person. Although there is no immunity against the Coronavirus yet, our practice has taken increased measures to assure you are entering an environment that has been cleaned and sanitized. Along with everyday ADA/OSHA sterilization guidelines, we are also taking the following precautions to assure you, as our patient, are safe, these include:

1. Aside from following OSHA regulations for sterilizing dental instruments and Sanitizing patient operatories after each treatment. We have increased the frequency of wiping down countertops, door handles, etc. in common areas with a certified disinfectant known to kill most viruses, including SARS – Novel Coronavirus (2019-nCoV). Our office floor is also disinfected at the end of the day.
2. Rescheduling patients who have informed us of any flu-like symptoms whether these symptoms are related to the Coronavirus or not.
3. I am protecting myself and the staff by utilizing adequate Personal Protective Equipment such as masks, gloves, gowns, and protective eyewear and always changing these P.P.E. and washing and sanitizing hands after each patient.

We also ask all our patients to do their part in keeping the spread of disease at a minimum. Please refrain from touching your face or mouth and wash your hands and use sanitizer frequently. Let our staff know if you feel ill, we would be glad to reschedule your appointment for later.

I will be glad to discuss any concerns you may have regarding this issue.

With regards,

Dr. Narkhede & Staff
